

# CHILD AND ADOLESCENT DEVELOPMENT

## SCOPE

“Child development”, or “child and adolescent development” refer to the process of growth and maturation of the human individual from conception to adulthood. The term “adolescence” has particular connotations in particular cultural and social contexts. It is used to describe young people who are in the stage of development that occurs between the beginning of puberty until adulthood, without any implication that this period is characterized by any particular behavior or attitudes. The Journal of Adolescent Health is a multidisciplinary scientific Journal dedicated to improving the health and well-being of adolescents and young adults. The Journal publishes new research findings in the field of Adolescent and Young Adult Health and Medicine ranging from the basic biological and behavioral sciences to public health and policy. We seek original manuscripts, brief reports, review articles, clinical case reports, letters to the editor, and commentaries from our colleagues in Anthropology, Education, Ethics, Global Health, Health Services Research, Law, Medicine, Mental and Behavioral Health, Nursing, Nutrition, Psychology, Public Health and Policy, Social Work, Sociology, Youth Development, and other disciplines that work with or are committed to improving the health and well-being of adolescents and young adults. In addition we seek poetry, personal narratives, images, and other creative works from young people, family and community members, and health professionals that deepen our insights into the lived experiences of adolescents and young adults in a way that can augment scientific peer-reviewed research. The Journal is the official publication of the Society for Adolescent Health and Medicine (SAHM), a multidisciplinary organization committed to improving the health and well-being of adolescents and young adults. One of the Society's primary goals is the development, synthesis, and dissemination of scientific and scholarly knowledge unique to the health needs of young people. To meet this goal, the Society established The Journal of Adolescent Health in 1980.

## **Research in Developmental Disabilities**

Full-text available from 1987 to present

Available in ScienceDirect E-journals

Research In Developmental Disabilities is an international journal aimed at publishing original research of an interdisciplinary nature that has a direct bearing on the understanding or remediation of problems associated with developmental disabilities. Articles will be primarily empirical studies, although an occasional position paper or review will be accepted. The aim of the journal will be to publish articles on all aspects of developmental difficulties using rigorous research methods. Our aim is to publish the best available and most current research possible.
